EDUCATION

Case Western Reserve University

Expected: May 2028

BS, Computer Science, Minor in Math and Mechanical Design

Cleveland, Ohio

- **Relevant Coursework:** Algorithms, Logic Design & Computer Organization, Linear Algebra, Database Machine Learning, Computer Security, Operating Systems

EXPERIENCE

Lakefront Biotherapeutics

June - August 2026

Intern

Chicago, Illinois

- Led enterprise security review for Claude adoption, coordinating approval across IT, legal, and leadership teams
- Audited 50+ unresolved tickets, then scripted the ServiceNow to Jira migration against both APIs
- Automated laptop provisioning with an AI-assisted PowerShell script, removing manual Autopilot and Intune setup

CWRU Quants

March 2025 - Present

Project Lead

Cleveland, Ohio

- Engineered a sentiment analysis Postgres data ingestion pipeline for 200,000+ earnings call documents
- Developed and deployed NLP models to perform sentiment analysis and identify key market-relevant topics
- Architected a sophisticated feature engineering process using techniques like TF-IDF and word embeddings to convert linguistic patterns into quantitative features for machine learning models
- Applied machine learning models to identify predictive signals from transcript-derived features
- Built an agentic code review pipeline triggered via GitHub Actions, autonomously analyzing PRs for lint issues, logic bugs, and test coverage to approve or block merges

CWRU Motorsports

Aug. 2024 - Present

Design Engineer

Cleveland, Ohio

- Led complete redesign of the team website using Vite and TypeScript, increasing site traffic by 18% and improving performance, maintainability, and user experience
- Co-developed a TypeScript-based inventory tracking system to streamline team stock organization
- Designed, manufactured, and validated rear drivetrain yokes; documented specs in structured data reports
- Supported brakes subteam in the design, manufacturing, and testing of brake rotors and pistons
- Developed an agentic AI Discord bot integrating MCP servers to autonomously retrieve part/inventory updates and summarize message history

CWRU Club Tennis

Aug. 2025 - Present

Vice President

Cleveland, Ohio

- Organized tournament logistics, including scheduling, travel, and rosters via automated spreadsheets
- Designed and launched custom club merchandise, incorporating team branding and member feedback

PROJECTS

courtinate.io

- Architected a tournament platform for collegiate club tennis in Next.js, TypeScript, and Supabase
- Integrated Stripe Connect payments: onboarding, direct charges, application fees, and automated refunds
- Developed round-robin, single and double-elimination draw generation with live WebSocket score updates
- Queued transactional email in Postgres with pgmq, cron workers, backoff, and dead-letter replay
- Enforced .edu-only signup, per-school row-level security, and signature-verified webhook handlers

iliterate.org

- Engineered a full-stack language reading platform in Next.js, TypeScript, and Postgres
- Built a Python FastAPI microservice for real-time word difficulty scoring and CJK tokenization
- Implemented SM-2 spaced repetition flashcards, XP level progression, and real-time leaderboards

CERTIFICATIONS, SKILLS & INTERESTS

- Certifications: SolidWorks CAD Design Associate
- Technologies: Python, Java, Git, JavaScript, TypeScript, SQL, Siemens NX, SolidWorks, Claude Code, Codex
- Skills: Critical-thinking, communication, collaboration, adaptability, attention to detail
- Languages: English (native), Polish (fluent)
- Interests: Tennis, Climbing, Drones, Photography, Wakeboarding, Skiing
